VHF khi tàu đến cảng: VTS, hoa tiêu và tàu xung quanh

91 câu xếp theo đúng trình tự một chuyến tàu đến cảng: gọi VTS xin chỉ dẫn, thả neo báo lại, hỏi giờ và cách đón hoa tiêu, qua các điểm báo cáo. Thêm phần trả lời khi tàu hải quân gọi tàu mình. Câu nào cũng có file nghe, đọc bằng nhiều giọng khác nhau như Ấn, Anh, Phi, Mỹ.

Muốn tập nói những câu này với giọng VTS thật?

Tôi làm app **SpeakAtSea** để anh em đi tàu luyện nói tiếng Anh. Trong 12 tuần tiếng Anh giao tiếp cho sĩ quan có sẵn các bài: khung một cuộc gọi VHF, báo cáo VTS, hẹn đón hoa tiêu, gọi một tàu khác, và thi thử nhập vai VHF. Người hỏi nói giọng Ấn, giọng Phi, giọng Anh, chỉnh chậm được. Bạn nói ra thành tiếng, ghi âm rồi nghe lại.

Xem 1 bài học mẫu → hieuatsea.com/app

i Dùng bộ này thế nào

- **Nghe file cả đoạn trước** (Phan-1-ca-doan.mp3 ...) cho quen nhịp một cuộc gọi, chưa cần nhìn chữ.
- **Nghe từng câu rồi nhại theo thành tiếng**. Tên file nằm cạnh mỗi câu (P1-01, P1-02...).
- **Che dòng tiếng Anh, nhìn dòng Việt tự nói ra**. Nói chậm, rõ, số đọc từng chữ số một.
- **Thay bằng tên tàu, hô hiệu, con số của tàu bạn**. Northport, Ocean Star, Sea Falcon chỉ là tên ví dụ.

1 Khung một cuộc gọi VHF — The shape of a VHF call

> Gọi đài trước, xưng tàu mình sau, rồi mới vào việc. Hết lượt nói thì nói **Over** (mời bên kia nói). Kết thúc hẳn cuộc gọi thì nói **Out**, không nói "Over and out". Số đọc từng chữ số một. Nghe không rõ thì **Say again**, đừng đoán.

TÀU MÌNH **Say again, please.** P1-01
Xin nhắc lại.
Câu chuẩn khi nghe không rõ. Không nói "What?", cũng không nói "Repeat please" (Repeat là để mình nhấn lại chỗ quan trọng).
SMCP tr.16 mục 9.2

TÀU MÌNH **My present speed is one-four knots. Mistake. Correction, my present speed is one-two knots.** P1-02
Tốc độ hiện tại là 14 hải lý/giờ. Nhầm. Sửa lại, tốc độ hiện tại là 12 hải lý/giờ.
Nói sai thì: Mistake, rồi Correction, rồi nói lại phần đúng.
SMCP tr.16 mục 7

VTS **How do you read me?** P1-03
Anh nghe tôi rõ không?
SMCP tr.16 mục 6.1

TÀU MÌNH **I read you good.** P1-04

2 Tới vùng VTS: xin chỉ dẫn đến cảng — Arrival: calling the VTS for instructions

Vào tới vùng VTS (điểm gọi ghi trên hải đồ, Sailing Directions hoặc hướng dẫn cảng) thì gọi VTS, báo giờ dự kiến tới trạm hoa tiêu và xin chỉ dẫn đến cảng (**arrival instructions**). VTS thường hỏi thêm vài thông tin của tàu, rồi cho 1 trong 3 kiểu chỉ dẫn: tới điểm nào đó thì gọi lại, neo tại một vị trí, hoặc vào neo ở một khu neo. Nhận chỉ dẫn xong thì **đọc lại** cho VTS.

TÀU MÌNH **Northport VTS, Northport VTS, this is Ocean Star, Ocean Star. Over.** P2-01
Northport VTS, đây là Ocean Star. Hết.
Gọi tên đài 2 lần, tên tàu mình 2 lần cho bên kia kịp nghe.

TÀU MÌNH **No, I have no deficiencies or restrictions.** P2-12

4 Nhổ neo và đón hoa tiêu — Heaving up and taking the pilot

Trước giờ đón hoa tiêu, gọi trạm hoa tiêu hỏi 3 thứ: **giờ đón (pilot boarding time)**, **cách đón (embarkation instructions)** — nhổ neo chạy ra điểm đón, hay nằm neo chờ xuồng hoa tiêu tới rồi mới nhổ — và **bố trí thang (boarding arrangement)**: loại thang, mạn nào, cao bao nhiêu, tốc độ tàu lúc đón. Nhận xong thì đọc lại.

Thả cầu thang mạn kết hợp thang hoa tiêu bên mạn phải, chân thang hoa tiêu cách mặt nước 2 mét. Tạo mạn khuất gió bên phải. Giữ tốc độ đón 6 hải lý/giờ. Hết.

Dân tàu gọi tắt là combination ladder. Từ mặt nước tới chỗ lên tàu cao hơn 9 m thì SOLAS bắt dùng kiểu này (SOLAS V/23, tr.233–234 bản hợp nhất 2020). "2 mét" là CHÂN THANG HOA TIÊU cách mặt nước. Chiếu nghỉ dưới của cầu thang mạn phải cao tối thiểu 5 m trên mặt biển, thang hoa tiêu nhô cao hơn chiếu nghỉ ít nhất 2 m (IMO A.1045(27) mục 3.3, 3.6).

5 Trong luồng: qua điểm báo cáo và nghe VTS — In the fairway: reporting points and VTS messages

Qua mỗi điểm báo cáo (phao, đèn, điểm ghi trên hải đồ) thì gọi VTS báo đã qua, kèm giờ. VTS mở đầu tin bằng từ đánh dấu: INSTRUCTION là chỉ thị phải làm, ADVICE là khuyến cáo, WARNING là cảnh báo, INFORMATION là thông tin. Nhận chỉ thị hay khuyến cáo thì nhắc lại bằng **I will...** hoặc **I will not...**. Hoa tiêu đã lên tàu thì nhiều cảng để hoa tiêu báo VTS, có khi bằng tiếng địa phương, nhưng mình vẫn phải nghe và hiểu.

TÀU MÌNH **Northport VTS, Ocean Star passing Bravo buoy, inbound, at zero-seven-three-zero hours local time. Over.** P5-01

SMCP tr.47 (iv) INFORMATION

VTS **INSTRUCTION. Do not overtake.** P5-05

Chỉ thị. Không được vượt.

INSTRUCTION có giá trị bắt buộc. Có lý do an toàn để không làm theo thì phải báo lại cho VTS.

SMCP tr.47 (i) INSTRUCTION · tr.56 A1/6.2 .3.5.16

TÀU MÌNH **I will not overtake.** P5-06

Tôi sẽ không vượt.

SMCP tr.15 mục 4.5

VTS **WARNING. You are running into danger. Shallow water west of you.** P5-07

Cảnh báo. Anh đang đi vào vùng nguy hiểm. Có vùng nước nông ở phía tây anh.

SMCP tr.18 mục 18.1 · tr.55 A1/6.2 .3.5.11

TÀU MÌNH **INTENTION. I will alter course to starboard. My new course is zero-three-zero degrees.** P5-08

Ý định. Tôi sẽ đổi hướng sang phải. Hướng mới của tôi là 030 độ.

Nước nông phía tây, tàu Blue Marlin cũng đang vượt bên phía tây, nên bẻ phải là né được cả hai. Gặp nước nông thì đổi hướng tránh xa rồi kiểm tra lại vị trí, giảm tốc không đủ. Ngoài thực tế trái hay phải, hướng mới bao nhiêu là theo hải đồ và tàu xung quanh.

SMCP tr.48 (viii) INTENTION

6 Gọi tàu xung quanh — Calling a ship nearby

Lấy tên tàu trên AIS rồi gọi đúng tên. Hỏi ý định bằng QUESTION, báo ý định của mình bằng INTENTION. **Bộ đàm không thay được COLREG**: không thoả thuận qua VHF một cách tránh va trái luật, và vẫn theo dõi phương vị tàu kia bằng mắt và radar. Phần này có 2 tình huống riêng.

TÀU MÌNH **Sea Falcon, Sea Falcon, the vessel two miles ahead of me, this is Ocean Star. Over.** P6-01

Sea Falcon, tàu đang ở phía trước tôi 2 hải lý, đây là Ocean Star. Hết.

Tình huống 1: tàu phía trước chạy rất chậm, không rõ định làm gì. Tên lấy trên AIS, luôn kèm vị trí tương đối để tàu kia biết đúng là mình đang gọi nó (gọi nhầm tàu là nguồn gốc nhiều vụ đâm va do thoả thuận qua VHF).

Hỏi. Ý định của tàu anh là gì?

Câu thông dụng trên VHF. SMCP chỉ quy định từ đánh dấu QUESTION, không có nguyên văn câu này.

SMCP tr.47 (v) QUESTION

TÀU KHÁC **I have problems with my engine. I am manoeuvring with difficulty. Keep clear of me.** P6-04

Máy chính của tôi đang trục trặc. Tôi điều động khó khăn. Tránh xa tôi ra.

SMCP tr.37 A1/2.1.2.1 · .3 · .4

TÀU MÌNH **I will keep clear of you.** P6-05

SMCP tr.15 mục 4.5

TÀU KHÁC **Ocean Star, this is Pacific Dawn. We are head-on. Can we pass starboard to starboard?** P6-06

Ocean Star, đây là Pacific Dawn. Hai tàu đang đối hướng. Mình qua nhau mạn phải với mạn phải nhé?

Tình huống 2, CÂU BẪY (bài 58 trong app). COLREG Điều 14: hai tàu máy gặp nhau ngược hướng hoặc gần ngược hướng, CÓ nguy cơ va chạm, thì mỗi tàu chuyển hướng sang phải, qua nhau mạn trái với mạn trái.

TÀU MÌNH **No, I will not pass starboard to starboard. This is a head-on situation. INTENTION. I will alter course to starboard.** P6-07

Không, tôi không qua nhau mạn phải với mạn phải. Đây là tình huống đối hướng. Ý định: tôi sẽ đổi hướng sang phải.

Chỉ dùng khi đúng là đối hướng: tàu kia ở ngay hoặc gần ngay phía trước, ban đêm thấy hai đèn cột gần thẳng hàng và/hoặc cả hai đèn mạn. Còn nghi ngờ thì coi như đối hướng (Điều 14c). Tàu kia đã nằm hẳn bên mũi phải, CPA an toàn thì KHÔNG phải đối hướng: đừng bẻ phải cắt mũi tàu kia.

SMCP tr.15 mục 4.2 · tr.48 (viii) INTENTION

TÀU MÌNH **Thank you. Ocean Star out.** P6-08

Cảm ơn. Ocean Star kết thúc liên lạc.

7 Khi tàu hải quân gọi tàu mình — When a naval vessel calls you

Tàu hải quân gọi thường là để ra **INSTRUCTION** (chỉ thị). Theo SMCP, chỉ thị từ tàu hải quân là bắt buộc làm theo, trừ khi mình có lý do an toàn thì phải báo lại cho họ. Cách trả lời: **nhắc lại nguyên văn chỉ thị**, bắt đầu bằng **I will** (làm được) hoặc **I cannot** (không làm được, kèm lý do). Nghe không rõ thì **Say again**, tuyệt đối không đoán rồi trả lời bừa. Phần này có 5 tình huống: khu tập trận bắt đổi hướng, bị hỏi thông tin tàu, tàu ngầm đề nghị qua nhau, bị cảnh báo cấm đi qua eo biển, và bị doạ bắn. Hai tình huống cuối hay gặp ở những vùng như eo Hormuz, Biển Đỏ: gọi thuyền trưởng lên buồng lái ngay, thuyền trưởng là người quyết định.

HẢI QUÂN **Ocean Star, Ocean Star, this is Warship one-seven-three. Over.** P7-01

Ocean Star, đây là tàu chiến 173. Hết.

Tình huống 1: khu tập trận lập bất ngờ. Tàu hải quân thường gọi trên kênh 16, gọi đúng tên tàu mình lấy trên AIS. Nghe thấy tên tàu mình là trả lời ngay.

Cách nói thực tế trên tàu

TÀU MÌNH **I have you on my radar now. Yes, we pass port to port. INTENTION. I will alter course to starboard.** P7-21
Giờ tôi đã thấy anh trên radar. Đồng ý, qua nhau mạn trái với mạn trái. Ý định: tôi sẽ đổi hướng sang phải.
Chỉ đồng ý khi đã xác định được tàu kia và cách qua nhau đúng COLREG (phần 6). Báo luôn việc mình sẽ làm bằng INTENTION.
SMCP tr.15 mục 4.1 · tr.48 (viii) INTENTION

TÀU MÌNH **Thank you. Ocean Star out.** P7-22
Cảm ơn. Ocean Star kết thúc liên lạc.
Cách nói thực tế trên tàu

HẢI QUÂN **Ocean Star, Ocean Star, this is Navy warship. You are entering a restricted area. Do not proceed. If you continue, you will be fired upon.** P7-23
Ocean Star, đây là tàu chiến hải quân. Anh đang đi vào khu vực cấm. Không được đi tiếp. Nếu đi tiếp, anh sẽ bị bắn.
Tình huống 4: bị cảnh báo cấm đi qua (kiểu eo Hormuz). Thật hay giả cũng xử lý như thật: gọi thuyền trưởng lên buồng lái ngay, ghi lại giờ, kênh, tên tàu gọi, nội dung.
Cách nói thực tế trên tàu

TÀU MÌNH **Navy warship, this is Ocean Star. Say again your name and call sign.** P7-24
Tàu chiến hải quân, đây là Ocean Star. Nhắc lại tên tàu và hô hiệu của anh.
BMP5 (tr.16) dặn: ở vùng rủi ro cao chỉ trả lời người gọi đã xác định được, vì có kẻ giả danh. Hỏi tên tàu, hô hiệu là bước xác định đầu tiên.
Cách nói thực tế trên tàu

HẢI QUÂN **This is Warship five-zero-two. INSTRUCTION. Alter course immediately to two-seven-zero degrees. Do not enter the strait.** P7-25
Đây là tàu chiến 502. Chỉ thị. Đổi hướng ngay sang 270 độ. Không được vào eo biển.
SMCP tr.47 (i) INSTRUCTION

hieuatsea.com

TÀU MÌNH **Stand by one minute. I am calling my Master.** P7-26

Chờ một phút. Tôi đang gọi thuyền trưởng.

Stand by luôn kèm thời gian. Sĩ quan trực ca không tự quyết vụ này, nhưng cũng không để kênh im lặng.

SMCP tr.15 mục 4.3

TÀU MÌNH **I will alter course to two-seven-zero degrees. I will not enter the strait.** P7-27

Tôi sẽ đổi hướng sang 270 độ. Tôi sẽ không vào eo biển.

Nhắc lại nguyên văn chỉ thị. Sau cuộc gọi: báo công ty và UKMTO theo kế hoạch an ninh của tàu (BMP5 tr.6: Report to UKMTO).

SMCP tr.15 mục 4.5

HẢI QUÂN **Ocean Star, evacuate your engine room now. In five minutes, we will fire at your engine room.** P7-28

Ocean Star, sơ tán buồng máy ngay. Năm phút nữa chúng tôi sẽ bắn vào buồng máy của anh.

Tình huống 5: bị doạ bắn. Câu này phải nghe ra ngay từ lần đầu: evacuate = sơ tán, engine room = buồng máy, five minutes = 5 phút.

Cách nói thực tế trên tàu

TÀU MÌNH **Understood. You will fire at my engine room in five minutes. I am evacuating my engine room.** P7-29

Đã hiểu. Năm phút nữa anh sẽ bắn vào buồng máy của tôi. Tôi đang sơ tán buồng máy.

Nhắc lại đúng phần quan trọng để chắc mình không nghe nhầm. Cùng lúc đó: kéo chuông báo động, gọi thuyền trưởng, đưa người ra khỏi buồng máy.

Cách nói thực tế trên tàu

TÀU MÌNH **I have two-one persons on board. Do not fire. QUESTION. What are your instructions?** P7-30

Trên tàu tôi có 21 người. Đừng bắn. Hỏi. Các anh yêu cầu tôi làm gì?

Nói số người trên tàu, rồi hỏi họ muốn tàu mình làm gì. Không cãi, không thách thức trên kênh.

SMCP tr.34 mục .6.1 · tr.47 (v) QUESTION · Cách nói thực tế trên tàu

TÀU MÌNH **MAYDAY, MAYDAY, MAYDAY. This is Ocean Star, Ocean Star, Ocean Star. Call sign three Echo Alfa Bravo seven. My position two-six degrees one-zero minutes North, zero-five-six degrees two-zero minutes East. I am under attack. I require military assistance. Two-one persons on board.** P7-31

MAYDAY, MAYDAY, MAYDAY. Đây là Ocean Star, hô hiệu 3EAB7. Vị trí 26°10' Bắc, 056°20' Đông. Tôi đang bị tấn công. Tôi cần hỗ trợ quân sự. Trên tàu có 21 người.

Khi bị bắn thật. SMCP có sẵn câu 'I am under attack by pirates' (ở đây bỏ 'by pirates' vì người bắn không phải cướp biển) và 'military assistance'. BMP5 (tr.29): gọi MAYDAY kênh 16, gửi báo nạn bằng DSC và Inmarsat-C, kích hoạt SSAS, gọi điện báo UKMTO ngay, giữ AIS bật.

SMCP tr.33 mục .8.1 · .8.2 · .3.1 · tr.15 mục 5.1

8 Đọc số và đánh vần — SMCP

Số đọc từng chữ số: 150 = **one-five-zero**, 2,5 = **two decimal five**. Riêng góc bánh lái trong khẩu lệnh lái thì đọc nguyên số: **fifteen**, **twenty** (SMCP trang 17). File nghe đọc số theo tiếng Anh thường; trên bộ đàm thật nhiều người đọc theo cột bên phải (TREE, FIFE, NINER), nghe quen cả hai.

Đọc xong rồi, giờ là lúc nói ra thành tiếng

Bộ câu này đọc thì hiểu. Nhưng lần đầu cầm bộ đàm gọi VTS, tai chưa quen giọng bên kia, miệng chưa nói câu nào ra tiếng, thì rất dễ líu lưỡi đúng lúc cần nói rõ nhất.

Trong app **SpeakAtSea** có bài phỏng vấn theo đúng chức danh (Cadet tới Đại phó) và 12 tuần tiếng Anh giao tiếp hằng ngày trên tàu: nhận lệnh lái, làm dây, gọi VHF với VTS và hoa tiêu, bàn giao ca. Tải về một lần là học được trên tàu, không cần mạng.

Học 7 ngày, nghe lại mà không thấy mình nói khá hơn thì tôi hoàn đủ tiền.

VHF on arrival: VTS, pilot station and ships nearby

How to use this

- **Play the whole-part file first** (Phan-1-ca-doan.mp3 ...) to get the rhythm of a call, without reading.
- **Play each line, then repeat it out loud**. The file name is next to each line (P1-01, P1-02...).
- **Cover the line and say it from memory**. Speak slowly and clearly, numbers digit by digit.
- **Swap in your own ship's name, call sign and numbers**. Northport, Ocean Star and Sea Falcon are only examples.

VHF pagdating ng barko sa port: VTS, pilot at mga barko sa paligid

91 linya na nakaayos ayon sa tamang pagkakasunod ng isang port arrival: tumawag sa VTS para sa instructions, mag-anchor at mag-report, itanong ang oras at paraan ng pilot boarding, dumaan sa mga reporting point. Dagdag pa ang pagsagot kapag tinawag ng warship ang barko mo. Bawat linya ay may audio, binabasa sa iba't ibang accent tulad ng Indian, British, Filipino, American.

i Paano gamitin ito

- **Pakinggan muna ang buong usapan** (Phan-1-ca-doan.mp3 ...) para masanay sa takbo ng tawag, hindi pa kailangang basahin.
- **Pakinggan ang bawat linya at ulitin nang malakas**. Nasa tabi ng bawat linya ang pangalan ng file (P1-01, P1-02...).
- **Takpan ang English, tingnan ang salin at sabihin ito**. Dahan-dahan at malinaw, isa-isang digit ang numero.
- **Palitan ng pangalan, call sign at numero ng barko mo**. Halimbawa lang ang Northport, Ocean Star, Sea Falcon.

1 Ang structure ng isang VHF call — The shape of a VHF call

Tawagin muna ang station, tapos ang barko mo, saka pumasok sa pakay. Kapag tapos ka nang magsalita, sabihin ang **Over** (ikaw na ang magsalita). Kapag tapos na talaga ang tawag, sabihin ang **Out**, huwag ang "Over and out". Ang numero ay binabasa nang isa-isang digit. Kapag hindi malinaw, sabihin ang **Say again**, huwag manghula.

SARILING BARKO

Say again, please. P1-01

Pakiulit.

Standard na sagot kapag hindi malinaw ang narinig. Huwag sabihin ang "What?", at huwag din ang "Repeat please" (ang Repeat ay para ikaw mismo ang umulit sa importanteng bahagi).

SMCP tr.16 mục 9.2

SARILING BARKO

My present speed is one-four knots. Mistake. Correction, my present speed is one-two knots. P1-02

Ang kasalukuyang speed ay 14 knots. Mali. Correction, ang kasalukuyang speed ay 12 knots.

Kapag mali ang nasabi: Mistake, tapos Correction, tapos sabihin ulit ang tamang bahagi.

SMCP tr.16 mục 7

VTS

How do you read me? P1-03

Malinaw mo ba akong naririnig?

SMCP tr.16 mục 6.1

SARILING BARKO

I read you good. P1-04

Malinaw kitang naririnig.

Scale na 5 level: bad (1), poor (2), fair (3), good (4), excellent (5).

SMCP tr.16 mục 6.1.1

VTS

Advise you change to VHF Channel one-four. P1-05

Pakilipat sa VHF channel 14.

SMCP tr.16 mục 6.3

hieuatsea.com

SARILING BARKO **Changing to VHF Channel one-four.** P1-06
Lumilipat na sa VHF channel 14.
SMCP tr.16 mục 6.3.1

2 Pagdating sa VTS area: humingi ng arrival instructions — Arrival: calling the VTS for instructions

Pagpasok sa VTS area (ang calling point ay nasa chart, Sailing Directions o port guide), tawagan ang VTS, ibigay ang ETA sa pilot station at humingi ng **arrival instructions**. Kadalasan may ilang tanong pa ang VTS tungkol sa barko, tapos magbibigay ng 1 sa 3 klase ng instruction: tumawag ulit pagdating sa isang point, mag-anchor sa isang position, o pumasok sa isang anchorage. Pagkatanggap ng instruction, **i-read back ito** sa VTS.

SARILING BARKO **Northport VTS, Northport VTS, this is Ocean Star, Ocean Star. Over.** P2-01
Northport VTS, ito ang Ocean Star. Over.
Tawagin ang station nang 2 beses at ang pangalan ng barko mo nang 2 beses para marinig ng kabila.
Paano talaga sinasabi sa barko

VTS **Ocean Star, this is Northport VTS. Go ahead.** P2-02
Ocean Star, ito ang Northport VTS. Go ahead.
Go ahead = sige, magsalita ka.
Paano talaga sinasabi sa barko

SARILING BARKO **Good morning, sir. Ocean Star, bulk carrier, from Singapore to Northport. My ETA at the pilot station is zero-four-zero-zero hours local time. Please advise arrival instructions. Over.** P2-03
Magandang araw. Ocean Star, bulk carrier, mula Singapore papuntang Northport. Ang ETA sa pilot station ay 04:00 local time. Humihingi ng arrival instructions. Over.
Pinakamahalagang unang linya: pangalan ng barko, klase ng barko, saan papunta, ETA sa pilot station sa local time, humihingi ng instructions.
Paano talaga sinasabi sa barko

VTS **Ocean Star, what is your present maximum draft?** P2-04
Ocean Star, ano ang kasalukuyang maximum draught?
SMCP tr.49 A1/6.1.1.11

SARILING BARKO **My present maximum draft is one-one decimal two metres, repeat one-one decimal two metres.** P2-05
Ang kasalukuyang maximum draught ay 11.2 meters, repeat, 11.2 meters.
Repeat = ikaw mismo ang umuulit sa importanteng bahagi para sigurado. Iba ito sa Say again, na humihiling sa kabila na umulit.
SMCP tr.49 A1/6.1.1.11.1 · tr.16 mục 9.1

VTS **What is your air draft?** P2-06
Ano ang air draft ng barko mo?
Taas mula sa tubig hanggang sa pinakamataas na bahagi ng barko. Itinatanong ito ng VTS kapag may tulay o kable ng kuryente sa ibabaw ng channel.
SMCP tr.49 A1/6.1.1.13

SARILING BARKO **Stand by. One minute.** P2-07
Stand by. Sasagot ako sa loob ng isang minuto.
Kung wala pang datos agad, sabihin ang Stand by kasama kung kailan ka sasagot. Huwag manahimik.
SMCP tr.15 mục 4.3

SARILING BARKO **My air draft is four-two metres.** P2-08
Ang air draft ng barko ay 42 meters.

Shallow water sa west, at ang Blue Marlin ay nag-o-overtake rin sa west side, kaya liko sa starboard para maiwasan ang dalawa. VHF saat kapal tiba di pelabuhan: VTS, pilot, dan kapal di sekitar

91 kalimat disusun sesuai urutan kapal tiba di pelabuhan: panggil VTS minta instruksi, lapor setelah lego jangkar, tanya jam dan cara naik pilot, melewati reporting point. Ditambah bagian menjawab saat warship memanggil kapal kita. Setiap kalimat ada audionya, dibacakan dengan berbagai aksen seperti India, Inggris, Filipina, Amerika.

i Cara memakai ini

- **Dengarkan dulu file satu bagian penuh** (Phan-1-ca-doan.mp3 ...) supaya terbiasa dengan alur panggilan, belum perlu membaca.
- **Dengarkan tiap kalimat lalu ulangi dengan suara keras**. Nama file ada di samping tiap kalimat (P1-01, P1-02...).
- **Tutup kalimat bahasa Inggris, lihat terjemahan lalu ucapkan**. Pelan dan jelas, angka dibaca satu per satu digit.
- **Ganti dengan nama kapal, call sign dan angka kapalmu**. Northport, Ocean Star, Sea Falcon hanya contoh.

1 Struktur satu panggilan VHF — The shape of a VHF call

Panggil stasiunnya dulu, sebut nama kapal sendiri, baru masuk ke pokok pembicaraan. Selesai giliran bicara, ucapkan **Over** (silakan pihak sana bicara). Kalau panggilan benar-benar selesai, ucapkan **Out**, jangan "Over and out". Angka dibaca satu per satu digit. Kalau tidak jelas, ucapkan **Say again**, jangan menebak.

KAPAL KITA

Say again, please. P1-01

Tolong ulangi.

Kalimat standar saat tidak dengar jelas. Jangan bilang "What?", juga jangan "Repeat please" (Repeat dipakai untuk mengulang sendiri bagian yang penting).

SMCP tr.16 mục 9.2

KAPAL KITA

My present speed is one-four knots. Mistake. Correction, my present speed is one-two knots. P1-02

2 Masuk area VTS: minta arrival instructions — Arrival: calling the VTS for instructions

Begitu masuk area VTS (titik panggil tertera di peta laut, Sailing Directions, atau panduan pelabuhan), panggil VTS, laporkan ETA ke pilot station dan minta **arrival instructions**. VTS biasanya menanyakan beberapa data kapal, lalu memberi 1 dari 3 jenis instruksi: panggil lagi saat sampai titik tertentu, lego jangkar di posisi tertentu, atau masuk anchorage tertentu. Setelah terima instruksi, **baca ulang** ke VTS.

KAPAL KITA

6 Memanggil kapal di sekitar — Calling a ship nearby

Ambil nama kapal dari AIS lalu panggil dengan nama yang tepat. Tanya maksud kapal lain dengan QUESTION, sampaikan maksud kita dengan INTENTION. **Radio tidak bisa menggantikan COLREG**: jangan bikin kesepakatan lewat VHF untuk cara menghindar yang melanggar aturan, dan tetap pantau baringan kapal lain dengan mata dan radar. 7 Saat warship memanggil kapal kita — When a naval vessel calls you

Warship memanggil biasanya untuk memberi **INSTRUCTION** (perintah). Menurut SMCP, instruksi dari kapal perang wajib diikuti, kecuali kita punya alasan keselamatan dan harus lapor balik ke mereka. Cara menjawab: **ulangi**

hieuatsea.com

instruksi kata per kata, mulai dengan **I will** (bisa dilakukan) atau **I cannot** (tidak bisa, sebut alasannya). Kalau tidak dengar jelas, **Say again**, jangan sekali-kali menebak lalu jawab asal. Bagian ini ada 5 situasi: area latihan militer yang memaksa ubah haluan, ditanya data kapal, kapal selam minta berpapasan, diperingatkan dilarang melintas selat, dan diancam ditembak. Dua situasi terakhir sering terjadi di perairan seperti Selat Hormuz dan Laut Merah: segera panggil Kapten ke anjungan, Kapten yang memutuskan.
